

Advania Cloud Insights (ACI) for Microsoft Azure

Optimise, secure and control your Azure investment with AI-driven insights

ACI for Azure is a read-only analytics platform that provides a 360-degree view of your real-time Azure spend and usage. Maximise your cloud investment by uncovering hidden expenses, idle resources and opportunities for cost optimisation and make informed decisions with detailed, FinOps-aligned insights and actionable recommendations.

Visualise and understand spend

Easily spot and act on cost-saving opportunities.

Effective cloud cost management

Efficiently manage test, development and production costs.

Cost alignment with stakeholders

Align cloud costs with business goals for better financial management.

Modernise your estate

Access the information needed to update and optimise your cloud infrastructure.

In-depth forecasting

Gain detailed insights for budgeting and forecasting cloud expenses.

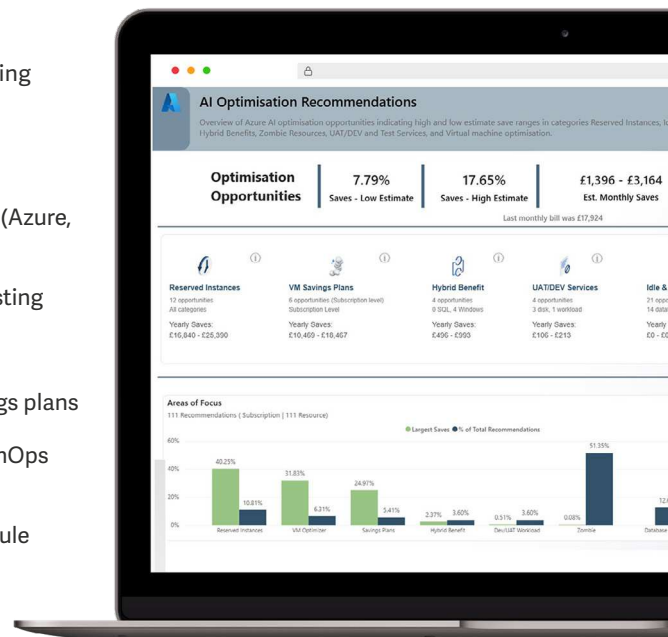

Enhanced security

Zero trust intelligence and enhanced security threat visibility.

What's included?

As a Microsoft-verified solution, ACI for Azure seamlessly integrates with existing Microsoft technologies to deliver immediate value and long-term benefits.

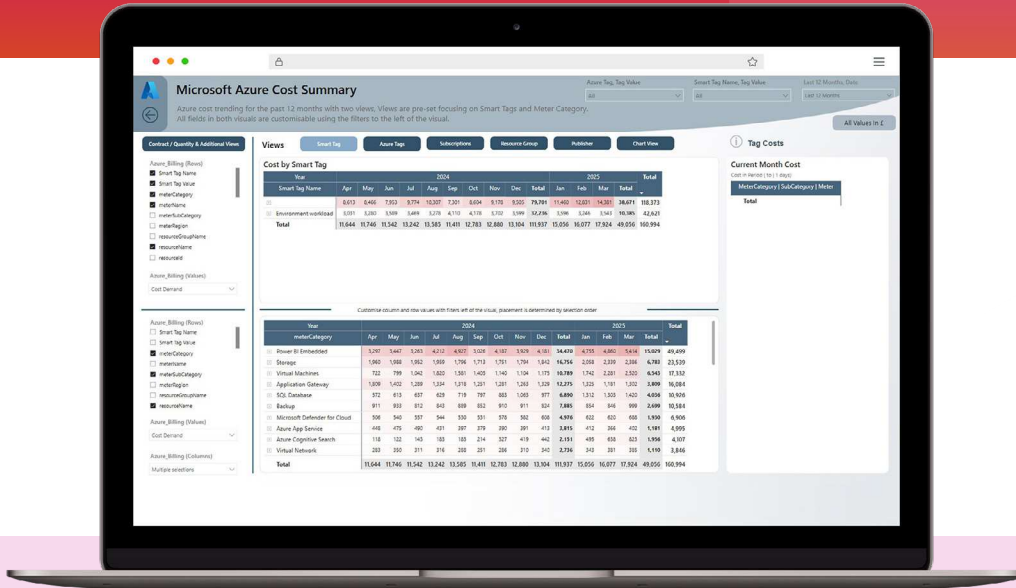

- ✓ AI-powered cost reduction recommendations
